**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to a composition, classified in class 435, subclass various.
- II. Claims 4-14, drawn to a first method of using said composition, classified in class 514, subclass various.
- III. Claim 15, drawn to a second method of using said composition, classified in class 530, subclass various.
- IV. Claims 16-17, drawn to a first kit, classified in class 424, subclass various.
- V. Claims 18 and 19, drawn to a second kit, classified in class 930, subclass various.

The inventions are distinct, each from the other because of the following reasons:

The inventions are each restrictable from one another since the composition can be used in different methods of use as is exemplified by the claims themselves. The kits are restrictable from one another since one does not require that the components are in separate compartments and the other kit does (i.e. they are not together).

Art Unit: 1654

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: the many different methods of administration of the composition. Applicant is required to pick a specific method of administering the composition.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 4 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1654

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The inventions are each restrictable from one another since the composition can be used in different methods of use as is exemplified by the claims themselves. The kits are restrictable from one another since one does not require that the components are in separate compartments and the other kit does (i.e. they are not together).
